👤 PROFESSIONAL SUMMARY

A recent MCA graduate from Bengaluru University with a strong desire to launch a career in the information technology field. I describe myself as an aspiring software developer who is constantly building my technical foundation. I am currently seeking a position that offers mentorship and the opportunity to utilize my skills while I continue to learn and grow as a professional.

▭ PROJECTS

Smart question paper Generator

- A Django-based web application to create, manage and generate examination question papers. Teachers can add questions to a question bank, filter by subject/year/unit, assemble papers with section-wise marks, validate total marks, and export the final paper as a PDF.

College Event Management System

- A full-featured College Event Management System (CEMS) built with Django. This application manages the entire event lifecycle from creation and HOD approval to participant registration with QR code tickets, check-ins, and feedback.

CORE SKILLS

Backend: Python, C lang, C++, .NET, JAVA

Database: MYSQL, OracleSQL

DevOps: GITHUB, AWS

Frontend: HTML, CSS

Other: OOPS, Django
